

## Chaffinch Optional Home Learning Due 30 June 2025 **Name:**

In geography, we are learning about our locality and how we fit into the wider world. We have taken part in a Secret Geographer Field Trip to discover some of the human and physical features near our school and are still trying to plan a day out in our local area to see how our locality has changed over time. (watch this space) But, there's always more to learn!

***Your task, if you choose to accept it, is to take any feature of our village and find out more about it...***

Let your creativity rule! You could find out about the plants and trees that grow here, or the wildlife. Paint a map complete with a compass, scale and key. Or you could survey traffic outside your house and produce a pie chart. Draw and label the types of houses on your street or write a report on the leisure facilities. Perhaps you'd like to make a model of your home or St James' church or of part of the village, make a collage of your favourite local place or write a poem about a certain feature? You could write a song about the village or interview someone who has lived here a long time. It's your ideas / choice

Could you link your learning to achieving a HOC (Heart of the Community) badge by doing something such as a litter pick and survey in different areas?

You can do anything you like as long as it's about something in our village. We will display our learning at an end of term celebration. Enjoy your challenge!
