

**What would you like to tell me about your science lessons?**

Y4 – I like the science experiments and how you get to do them.

Y6 – The lessons are fun, educational and lots of work. There are tons of resources.

**Why is learning about science important?**

Y4 – We learn new things so that if you want to do it when you're older you know what it is about.

Y4 – It is used in everyday life. It's everything, science.

**What scientific skills do you think you have developed?**

Y3 – You have to be careful, gentle.

Y4 – testing

Y6 – Classifying things.

**What do you enjoy about it?**

Y4 - it's fun

Y4- you get to predict and see if you're correct

Y4 – at the end you can look back at and see that it is interesting and fun and you have learnt a lot.

**Science would be even better if...**

Y6 – it's already great but you could do more research before actually actually doing the learning.

**What are you most proud of in your science learning?**

Y3 - we filled up all these pages in our books. I liked going all around the school to see what sounds we could hear.

Y4 – I liked when we were learning about fossils and putting them in order.

Y2 – I liked learning about mammals with Mrs Metcalf's dog.

Y4 – I liked the egg experiment that showed what could happen to our teeth Now I know what drink is good or bad for our teeth.

Y4 -I liked learning how plants move seeds around.

Y4 – we cut celery and put food colouring in water to see what happens.

Y6 – I like learning about the planets and the sun. We researched that to find out more.

Y6 – I liked using wires, motors and batteries to make circuits.
